

ENZO TCG

Rules

The Game is concluded when one or more of the following requirements are met:

1. One side forfeits.
2. Another Party Calls the game to an end (In which the party that has fewer prize cards wins).
3. A case where a party has no cards benched to put into the active slot, and no characters are in the active slot.
4. A side claims all of its prize cards.

A Character name "IE Ruby Rose" may not be played multiple times on the same side unless an active card, or the card itself, makes a distinct exclusion. Even if the character is enhanced upon, it still acts as if it is in play.

Items may be played as much as the user likes during a turn; however, only one item can be attached to a single character.

Summons can only be played (unless explicitly stated otherwise by a card played or in play) once per turn. Summons also follows the Character name rule.

Unless stated otherwise, when a basic or enhanced character reaches Ohp, the opponent draws 1 prize card. If a summon is removed from play, the opponent draws 0 prize cards. And if the opponent knocks out an EX or a  character, then they draw 2 prize cards.

This rule sheet may be referenced at any time.

One setting can be put into play at a time (unless explicitly stated otherwise), If the opponent plays a setting, the one who played the current setting, must discard the current setting. A setting must be in play for 2 turns before a setting change can be initiated.

If a summon is (in any case) ignored for a turn, any counter on it will not be decreased.

Decks

A Deck must have a minimum of 4 unique character cards, and is allowed to have as many as the holder wants.

A deck is 60. That excludes energy.

Energy is stored in what is called an “Energy stockpile” at the start of the game. The energy stockpiles are equalized, with a minimum of 10. When energy is discarded or the character with the energy is discarded, it will return to the bottom of the Energy Stockpile.

A card may be in a deck up to three times, (under the same name).

At the start of the battle

At the start of a battle, both sides draw 5 cards. If there are no usable cards, show your hand to the opponent, reshuffle your deck, and draw 5 again. Once done 5 times, check the deck on its legality. If it is legal, reshuffle the deck and repeat the process. Then lay out your Prize cards, lay out your active card and any party cards face down, and flip a coin to determine who goes first.

Your turn

1. Draw (Always comes first, take one from the draw deck and one from the Energy stockpile.)
2. Place a character onto the bench
3. Retreat character (once per turn, R cost)
4. Attach an energy (Once per turn)
5. Enhance (Must have had the character on the bench for 1 turn prior)
6. Play Summons / Settings (1 of each per turn)
7. Play Items
8. Shuffle drawing decks (Once per turn)
9. Use an ability (If applicable)
10. Attack (Ends turn)

Status effects:

Place a token on a card according to the cause. Usually cured by a card returning to the hand.

Ability: The effects of an ability are active.

Asleep: Card can not do anything while asleep. flip a coin after each turn, if heads, recover. If the card is hit, it recovers as well.

Blinded: Lasts one (1) turn, this card cannot attack.

Burn: Deals 30 fire damage each turn. Flip a coin each turn, if heads recover.

Confused: When this card is attacking, flip a coin, If heads, recover and proceed with the attack. If tails, flip another coin, if that lands tails, then deal 10 omni damage to this card, otherwise, do nothing and stay confused.

Marked for death: Given a time and recoverability (named by cause), this card will immediately be discarded. As long as it is still in play. This status can not be removed by the card going into the hand.

Poisoned: Deals 20 Negative damage each turn. Flip a coin each turn; if heads, this is cured.

Paralyzed: The Card can not attack or move. Flip a coin; if heads, this is cured.

Turns:

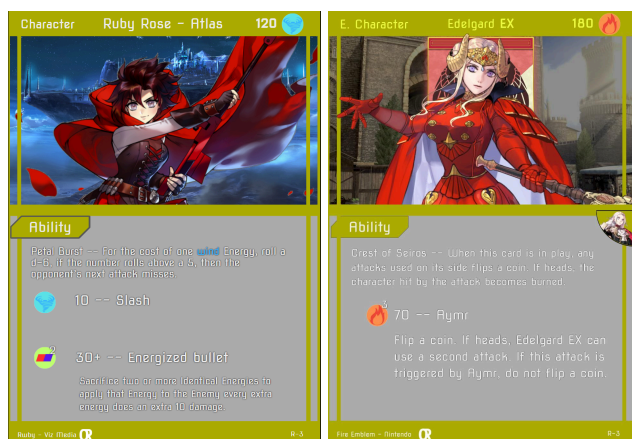

A turn is a single player's ability to make a move. If skipped, the number only goes up by 1, instead of two. Summon timers go by each turn. If deactivated, summon timers don't decrease.

Card Archetypes --->

Character Cards

These are examples of characters.

Character types: E(nhanced) cards have basic cards that they enhance upon. Basic characters do not.

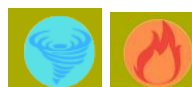

Name: Two characters of the same name can not be played simultaneously (Ruby Rose) on the same side.

Name specification: Typically used when Multiple cards exist with the same name. When EXs are defeated, unless specified otherwise, they will yield 2 prize cards.

Hp: Amount of damage the card can take before being destroyed.

Type: Unless specified otherwise, this is the element that they deal damage and take damage in, inheriting any damage changes.

Enhancement Marker: Only on Enhanced cards, the image shows the card they can enhance. If the Name Specification (excluding EX) does not match the basic form, it can not be enhanced.

Ability

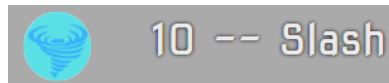

Petal Burst -- For the cost of one **wind** Energy, roll a d-6, if the number rolls above a 5, then the opponent's next attack misses.

Ability

Crest of Seiros -- When this card is in play, any attacks used on its side flips a coin. If heads, the character hit by the attack becomes burned.

Ability: Actions separate from attacks.

10 -- Slash

3 70 -- Aymr

Flip a coin. If heads, Edelgard EX can use a second attack. If this attack is triggered by Aymr, do not flip a coin.

Energy: Energy type needed to attack.

Energy count: the amount of specified energy needed to perform an attack.

Damage: Amount of damage an attack does (“ “ = No damage, “##0” = Damage given; “+” = adds damage based on what the attack description says, “-” = subtracts damage based on what the attack description says, “*” = Multiplies damage based on what the attack description says, “/” = Divides damage based on what the attack description says, “%” = does a percentage of the opponent's health, rounded up.)

Attack Description: Extra things the attack may do (if applicable).

Rwby - Viz Media

Fire Emblem - Nintendo

Series: The franchise they belong to, which can be used for categorization purposes.

Copyright Holder: Who actually owns the character.

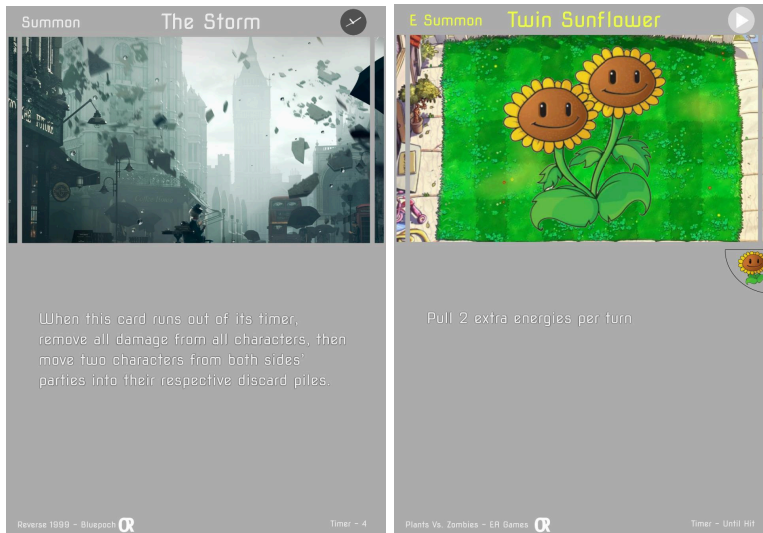

Set Symbol: Notater for the set the card belongs to.

R-3

R-3

Retreat Cost: How much it costs in energy to return a card to the party. Discard the respective amount of energy.

Summon Cards

Examples of Summon Cards.

Summon types: E(nhanced) cards have basic cards that they enhance upon. Basic characters do not.

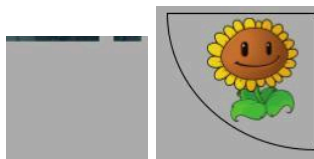

Name: Two Summons of the same name can not be played simultaneously on the same side.

Name specification: Typically used when Multiple cards exist with the same name. When EXs are defeated, unless specified otherwise, they will yield 2 prize cards.

Type: If Applicable: unless specified otherwise, this is the element that they deal damage and take damage in, inheriting any damage changes.

Enhancement Marker: Only on Enhanced cards, the image shows the card they can enhance. If the Name Specifications do not match the basic form, it can not be enhanced.

When this card runs out of its timer, remove all damage from all characters, then move two characters from both sides' parties into their respective discard piles.

Pull 2 extra energies per turn

Action Description: The actions that they perform when applicable.

Reverse 1999 - Blueepoch 

Plants Vs. Zombies - EA Games 

Series: The franchise they belong to, which can be used for categorization purposes.

Copyright Holder: Who actually owns the summons.

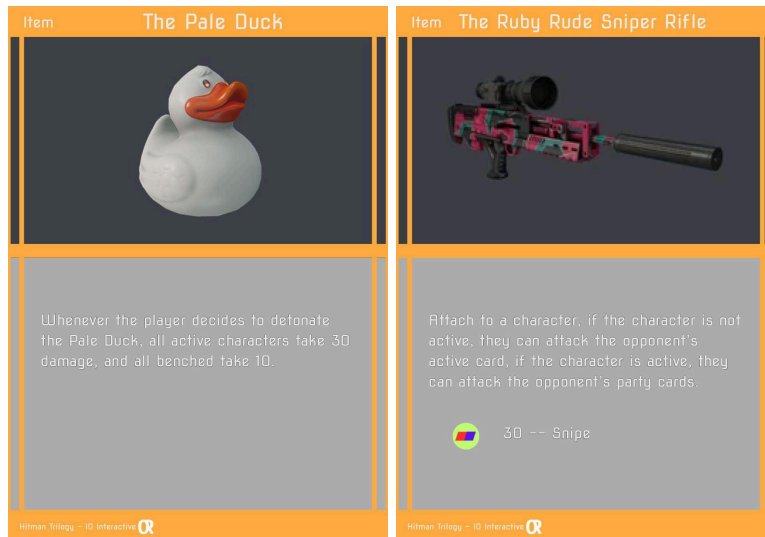

Set Symbol: Notater for the set the card belongs to.

Timer - 4

Timer - Until Hit

Timer: How long the summon lasts [measured in A.) turns, B.) Until an event, or C.) HP.]
If the card is disabled, it's timer will freeze until it's re-enabled. Once the timer runs out, discard the summon.

Item Cards

Examples of Item Cards

Item notator: Tells that this card is an Item.

Name: The item's name.

Whenever the player decides to detonate the Pale Duck, all active characters take 30 damage, and all benched take 10.

Attach to a character, if the character is not active, they can attack the opponent's active card, if the character is active, they can attack the opponent's party cards.

30 -- Snipe

Item Function: What the item does and how to use it. There can also be an attack.

Energy: The energy to use the added attack.

Damage: Amount of damage an attack does (“ “ = No damage, “##0” = Damage given; “+” = adds damage based on what the attack description says, “-” = subtracts damage based on what the attack description says, “*” = Multiplies damage based on what the attack description says, “/” = Divides damage based on what the attack description says, “%” = does a percentage of the opponent’s health, rounded up.)

Attack effects: Extra things an attack may do.

Hitman Trilogy – IO Interactive 

Hitman Trilogy – IO Interactive 

Series: The franchise the item belongs to, which can be used for categorization purposes.

Copyright Holder: Who actually owns the item.

Set Symbol: Notater for the set the card belongs to.

Setting Cards

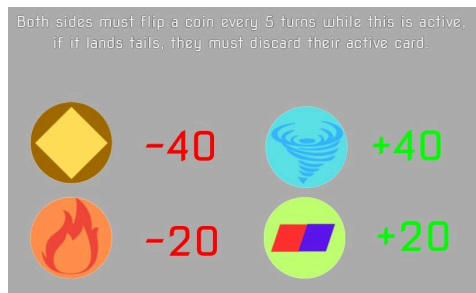

Example of a Setting card

Setting

Setting notator: Notates that this is a setting.

Train

Name: name of the setting.

Setting Effect: (If applicable) gameplay mechanics that come with the setting in play

Attack Modifiers: Add/subtract the number next to the element to determine how much damage the attack does.

Series: The franchise the item belongs to, which can be used for categorization purposes.

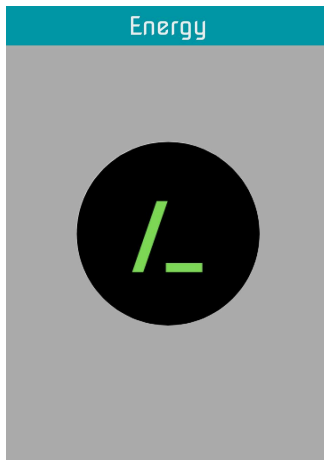

Copyright Holder: Who actually owns the item.

Set Symbol: Notater for the set the card belongs to.

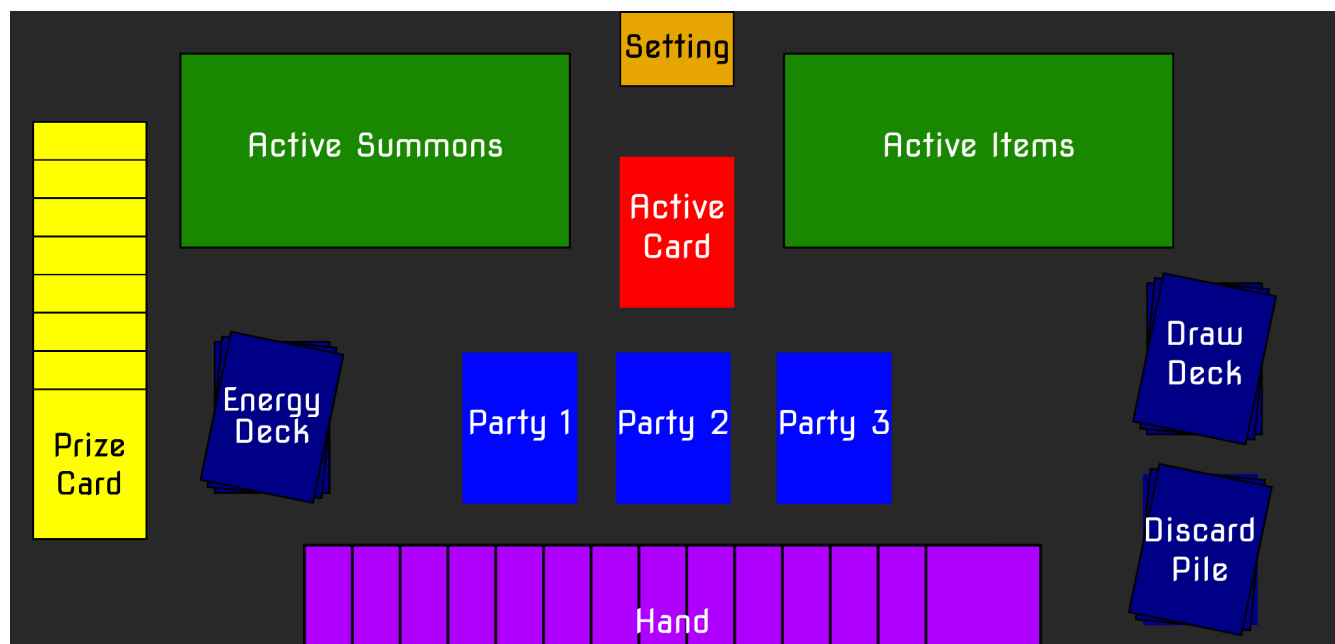

Consequence Cards

Consequences are a special kind of summon that takes effect on allied cards only. And end the turn instead of a move.

Energy Cards

Card Setup

Active Card

This is a Character Card and is the current attacker, any attack is directed toward the Active card. The Active cards and Party cards free of energy once the active card makes an action.

Party Cards

These are Character Cards, When an AOE attack is applied the Party Cards will be damaged, When the Active card goes to OHP, Party 1 takes the Active Card's Place, and Party 2 and 3 Shift up respectively. Party Cards can be swapped out with Character Cards in the hand for a cost displayed on the cards, however, for the same cost, you can also heal Party Cards. When a Party

Card reaches Ohp, Replace the card with a character in your hand.

Hand Cards

These Cards are Inactive, They can be Character Cards, Item Cards, Summon Cards, Charge Cards, or Setting Cards. Item, Setting, and Summon cards can be put on active once a turn.

Draw Deck

This Is where you Draw From.

Discard Pile

When a card expires, This is where you put it.

Active Summons/Items

This is where active (Non-Character)
cards.

5. 6-sided Dice

Important Terminology:

Overflow Damage: When a character's health is lower than the amount of damage dealt to it, it creates a new variable called overflow damage. In the case that something relies on overflow damage, but there is none, then the use case fails.
